When the modern-day flush toilet system was invented it represented one of mankind's most marvelous advancements. Until recently, many workers did not have this convenience available to them. Today, portable field sanitation can provide a dignified, healthful and dependable sanitation system to any location.

The portable sanitation industry set out over 40 years ago to develop portable sanitation facilities that would provide both privacy and cleanliness for human sanitation.

The Portable Sanitation Association International was formed in 1971 by progressive leaders in the portable sanitation industry who realized the necessity to standardize and strengthen government and industry guidelines. The Association promotes the business interests of the industry, stimulates continued improvement in the skills and materials employed in the industry, serves as an industry spokesman and fosters high standards within the industry.

**Listed below are a few situations where portable sanitation is in common usage:**

- Airports
- Amusement Parks
- Athletic Events
- Auctions
- Auto Races
- Baseball Leagues
- Block Parties
- Boat Harbors/Marinas
- Bus Stops
- Camping Areas
- Christmas Tree Lots
- Civil Defense Emergencies
- Company Picnics
- Concerts
- Contractors (all categories)
- Cross Country Ski Courses
- Dairies
- Discount Garden Centers
- Dog Shows
- Emergency Facilities
- Fairs
- Farms
- Festivals
- Fund-Raising Events
- Girl Scouts/Boy Scouts
- Gun Clubs
- High School Football
- Highway Projects
- Historical Sites
- In-plant Offices
- Lake Cottages
- Lumber Yards
- Manufacturing Plants
- Marathon Races
- Medical Facilities - Emergency
- Military Installations
- Mining
- Model Homes
- Moving & Storage Areas
- Nature Trails
- Observation Stands
- Parking Lot Sales
- Parks
- Pipe Line Companies
- Public Access Areas
- Public Markets
- Railroads
- Refineries
- Remote Parking
- Resorts
- Rest Areas
- School Playgrounds
- Scrap & Waste Material Lots
- Ski Hills
- Snowmobile Events
- Stadiums & Amphitheaters
- Steel Mills/Yards
- Stone & Gravel Operations
- Trailer Parks
- Trucking Terminals
- Utility Construction Projects
- Wrecking Contractors
- Weddings
- Work Sites
PSAI MISSION STATEMENT

It is the mission of the Portable Sanitation Association International (PSAI) to expand and improve portable sanitation services and facilities worldwide and to be recognized as the authority within our industry.

PSAI VISION STATEMENT

The PSAI is an organization which:

• Is recognized internationally as the credible, authoritative voice of the portable sanitation industry.

• Continues to educate the industry, general public and government entities and provides tools to promote safety and health.

• Represents international members through a regional network and assists and promotes the setting of standards and services as a repository of information and resources for all.

Through our efforts the environment is a cleaner, safer place.

PSAI CODE OF ETHICS

The PSAI Member...

• Conducts their business in the public interest and adheres to policies and procedures relating thereto.

• Operates constantly in accordance with the best and most fully accepted business practices.

• Provides safe and sanitary portable equipment and maintenance services at fair, equitable and nondiscriminatory charges.

• Complies with all legally applicable governmental regulations.

• Furnishes adequate equipment, supplies and qualified personnel to achieve and maintain the highest standard of technical performance.

• Recognizes the rights and respect due customers and clients and strives for similar recognition by all service staff members.

• Recognizes and respects the rights and privileges of competitors in the true fashion of individual initiative and free competitive enterprise, while offering similar services of constantly increasing quality with a reasonable profit return.

• Contributes regularly to the improvement of the industry’s public affairs.

• Strives for continued improvement of the image and reputation of the industry by practicing good and enlightened public relations in the community and by keeping the community adequately informed of the functions and services of the firm and the industry.

• Participates loyally in the industry’s growth and progress through the activities and the public interest efforts of the Association.

• Adheres to the constitution and bylaws of the Association in their business affairs.

• Recognizes the PSAI Code of Ethics are not binding by rule of law but are a moral guideline individually accepted and honored.
Portable restrooms are the primary sanitation facility for the construction industry. Contractors realize that when employees have to leave the job site or walk too far to use restroom facilities it costs money. *The average time needed, including travel, to make one off-site restroom usage is 7 minutes. If you divide a worker’s pay plus benefits/hour by 60 minutes you’ll discover the cost for each minute of restroom usage.* A University of Missouri-St. Louis Study, "Provision of Sanitation Facilities at Construction Sites," calculated that at four types of construction sites studied in the St. Louis area, contractors earned an 850% return on their investment in portable facilities. Availability of units was important in the study. Every group of seven (7) workers had access to a facility within 100 feet of the group’s central location. Portable units are not only less expensive than permanent facilities but their use improves productivity.

The following table indicates how many portable restroom facilities are needed based on the number of employees:

<table>
<thead>
<tr>
<th>Number of Employees</th>
<th>Minimum Number of Restroom Facilities If Serviced Once/Week</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 - 10</td>
<td>1</td>
</tr>
<tr>
<td>11 - 20</td>
<td>2</td>
</tr>
<tr>
<td>21 - 30</td>
<td>3</td>
</tr>
<tr>
<td>31 - 40</td>
<td>4</td>
</tr>
<tr>
<td>Over 40</td>
<td>1 additional facility for each 10 additional employees</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Number of Employees</th>
<th>Minimum Number of Restroom Facilities If Serviced More Than Once/Week</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 - 15</td>
<td>1</td>
</tr>
<tr>
<td>16 - 35</td>
<td>2</td>
</tr>
<tr>
<td>36 - 55</td>
<td>3</td>
</tr>
<tr>
<td>56 - 75</td>
<td>4</td>
</tr>
<tr>
<td>76 - 95</td>
<td>5</td>
</tr>
<tr>
<td>Over 95</td>
<td>1 additional facility for each 20 additional employees</td>
</tr>
</tbody>
</table>

The Occupational Safety and Health Agency (OSHA) requires sanitation facilities at all work sites in the United States. PSAI maintains a close liaison with OSHA and other regulatory agencies such as the American National Standards Institute (ANSI) to assist in the writing, updating and observance of uniform codes and regulations, locally and nationwide.
Proper planning is the key to successful special events and mass gatherings. Studies indicate that adequate restroom facilities have a significant impact on attendance and profitability. Since visual effects make the greatest impression on attendees, special consideration should be given to quantity, placement and service. Because users of the portable restroom facilities determine the quality of service based on both real and perceived conditions, the special events coordinator will want nice, clean, high quality units that are in good repair with vent screens and door locks. Proper service will maintain the condition of the units with regards to the level of waste, the availability of tissue and clean interior. Even if the event is not large enough to warrant pumping service, general housecleaning can make a significant impact on the event.

A bad experience with a portable restroom can affect the users attitude toward the event itself.

Providing too few units can have a major economic impact on promoters and vendors. Providing too many units can cause an excessive expense for the promoters. The following chart provides a guideline in determining the number of portable restroom facilities necessary to provide adequate service for your customers.

**Number of units required when no pumping service is provided:**

50/50 mix of men & women

1 unit provides approximately 200 uses with 4 hours between uses

</table>

For anticipated crowds over 20,000 people, please call your local portable restroom contractor or contact the Portable Sanitation Association International at 952-854-8300 / 800-822-3020.
Under normal conditions most persons will use sanitation facilities once every four hours. Each portable sanitation unit should accommodate a maximum of 200 uses. Weather conditions and the consumption of food, liquids, beer and other alcoholic beverages will increase usage by 30-40%. Your local portable sanitation service contractor’s experience will help you in planning properly for any event. During large events requiring more than 10 portable restrooms for more than one day requires additional service. This enables the portable restroom contractor to adequately handle any sanitation problems that may arise.

This hypothetical example illustrates how good sanitation planning can impact a special event.

Assumptions:
1. There are 10,000 attendees at an event.
2. The sponsor budgets $6,000 for portable restroom facilities.
3. Each attendee spends $3.00/hour at the event.

The average cost for the portable restroom facilities is $.60/attendee. If the average attendee is satisfied with the cleanliness, availability and absence of long lines to use the portable restroom facilities, he/she will be willing to use the facilities and thus stay at the event longer. If each attendee lengthens his/her visit by only 12 minutes, the additional gross revenues to the event sponsors will pay for the cost of furnishing portable restrooms.

Good planning for sanitation at special events pays! A satisfied customer will stay longer, spend more money and return next year. Your portable restroom contractor can advise you on availability of handwashing units, accessible facilities and many other special event items.

General Statistics:

- Mean toilet use time: Men 54 seconds, Women 75 seconds.
- Average water usage per person per day is 65 gallons.
- Flush toilets use 40% of the water consumed in a home.
- 16.2 gallons of water is used per person per day in flush toilets.
- A portable restroom facility uses 90% less water than a conventional flush toilet.
